Release 25.04.94 Notes

Test Release Date: April 11th, 2025, **Production Release Date:** April 25th, 2025

Agent Update

None

Introduction

EPMware Release 25.04.94

This is a minor release containing new features and enhancements to existing features, and API additions. The features of this release were developed to enhance the design capabilities, performance, and improve ease of use of applications. System administrators and users will benefit from the enhancements across their application.

Bug Fixes

EW-2234 Sorting by application type does not display applications in the correct order

Description

If # of applications are > 10 then sorting the grid by Application Type gives inconsistent results.

EW-2238 [INTERNAL] Getting InResponseTo attribute but not found saved request on the server side

Description

Getting InResponseTo attribute but not found saved request on the server side

While testing the login process, we ran into an error related to something called `inResponseTo`. This is basically a way for the system to match the login request with the response it's supposed to answer.

If the user is sitting for a long time on the login screen. then click on the Company Sign On. It will go to the OKTA login after correct credentials, when comes back to EPMware, it shows this error.

After the fix, users are able to login into EPMware, once entering the correct credentials via SSO.

EW-2239 Refreshing Request intermittently shows root nodes twice in the Metadata Explorer section on the Request Page

EW-2242 The Dashboard sorting by Status column was not working

EW-2248 Renaming a member with a different case throws error "Member already exists"

Improvements

EW-2061 Perform Property Configuration Validations before Saving

Description

Following attributes of a new property should be validated before saving them.

1. Property Name uniqueness
2. Property Label uniqueness
3. SQL Validations

EW-2218 Enable Metadata Module flag when creating a new User Group in the Security Module

EW-2233 After adding new user (SAML or Native) refresh the grid

EW-2235 Allow renaming of member names in HFM applications

EW-2241 Show Action Code in the Bulk Upload Validation Popup

EW-2250 Add "Property Association" type issues in "Metadata Integrity Discrepancies Report"

EW-2256 Add new parameter for specifying Parent Member name in the "ancestors_having_prop_value" Logic Builder API
