Release 24.12.90 Notes

Test Release Date: Dec 14th, 2024, **Production Release Date:** Dec 27, 2024

Agent Update

HCM Deployments updated

Introduction

EPMware Release 24.12.90

This is a minor release containing new features and enhancements to existing features, and API additions. The features of this release were developed to enhance the design capabilities, performance, and improve ease of use of applications. System administrators and users will benefit from the enhancements across their application.

Change Types	# of items
New Features	1
Improvements	9
Fixes	4
Total	14

New Features

EW-2069 “Expand All” option in the Metadata Explorer and Request modules

Description

Add “Expand All Descendants” option in the right click menu list for this feature.

Improvements

EW-2159 Change Session timeout to 4 hour

Description

Current session timeout is quite early, changed it to 4 hour.

EW-2088 Perform validations when user creates same property using either Name or Label

Description

If user creates a property with either the same name or label then system will not allow it.

EW-2156 ERP Import Mapping Screen - Value field should be grayed out if Mapping Type is Import

Description

Changes

For both Header and Line Mappings we need to make "Value" field grayed out if the Mapping Type is "Import"

Can the label on the Edit Mapping Popup be dynamic?

For Mapping Type - Constant it should be Constant Value and for Mapping Type Derived it should be labelled as "Derived Value using Function"

EW-2171 Improve Performance of Property Values Loading in Metadata Explorer and Request screens

Description

Improved Performance of Property Values Loading in Metadata Explorer and Request screens

EW-2172 Add REST API to download Deployment Files in the Deployment Module for a specific Deployment ID

Description

Added one new REST API calls to allow users to download Deployment files.

API : get_file

Payload (Deployment ID, file_name) (OR Deployment_id in header and payload contains only file_name) whatever works for you.

```
SELECT file_data
FROM ew_dep_files_v
WHERE deployment_id = <deployment_id>
AND file_name = <file_name>
```

EW-2175 Information about Application Name, Dimension Name and Top Member Name specified in the Export module will be available to be referred in Pre Export Logic Scripts

Description

If Pre Export Logic Script needs to determine the Top Member Name being processed (if Export has multiple dimensions with different top member names then following variables will be useful for developers to develop logic based on top member names if required.

ew_lb_api.g_exp_top_member_name

ew_lb_api.g_exp_app_name

ew_lb_api.g_exp_dim_name

EW-2176 Improve performance of Synchronize Hierarchies Report

Description

Currently, it is taking 2 hours for ISS. We have Identified bottleneck and this should help reduce the time it takes.

EW-2178 Create Application Properties for HPCM application types to restructure cubes and update databases

Description

Currently, we have only one parameter which does following three tasks after deploying metadata to HPCM Applications. We added the two following parameters:

HPCM_RESTRICTURE_CALCULATION_CUBE (By default Y) (New)

HPCM_RESTRICTURE_REPORTING_CUBE (By default Y) (New)

HPCM_UPDATE_DATABASE (By default Y)

EW-2183 Add Total Member Properties Count in the Dimension Statistics Report

Description

And change Column headers to be more user friendly.

Fixes

EW-2093 In ERP Import - Mapping Screen for Lines popup increase size of Column [Value] if the Mapping type is Derived

EW-2093 In ERP Import – For Lines popup on Mapping Screen increase size of the Column [Value] if the Mapping type is Derived

Agent Update Instructions:

Two Agent files are updated for Oracle HPCM applications. No restart of agent is required. Download the following two files and apply to servers where EPMWARE agents are installed on the HPCM servers:

[Amazon S3](#) > [Buckets](#) > [epmwarecloud](#) > [Releases/](#) > [EPMWARE Agent/](#) > [Updates/](#) > [R90/](#)

Amazon S3
