Release 23.12.78 Notes

Test Release Date: December 11, 2023, **Production Release Date:** December 22, 2023

Agent Updates

None

Introduction

EPMware Release 23.12.78

This is a minor release containing new features and enhancements to existing features, and API additions. The features of this release were developed to enhance the design capabilities, performance, and improve ease of use of applications. System administrators and users will benefit from the enhancements across their application.

Change Types	# of items
New Features	1
Improvements	6
Fixes	8
Total	15

New Features

New Fixed Width Export Format allows columns to have fixed column size.

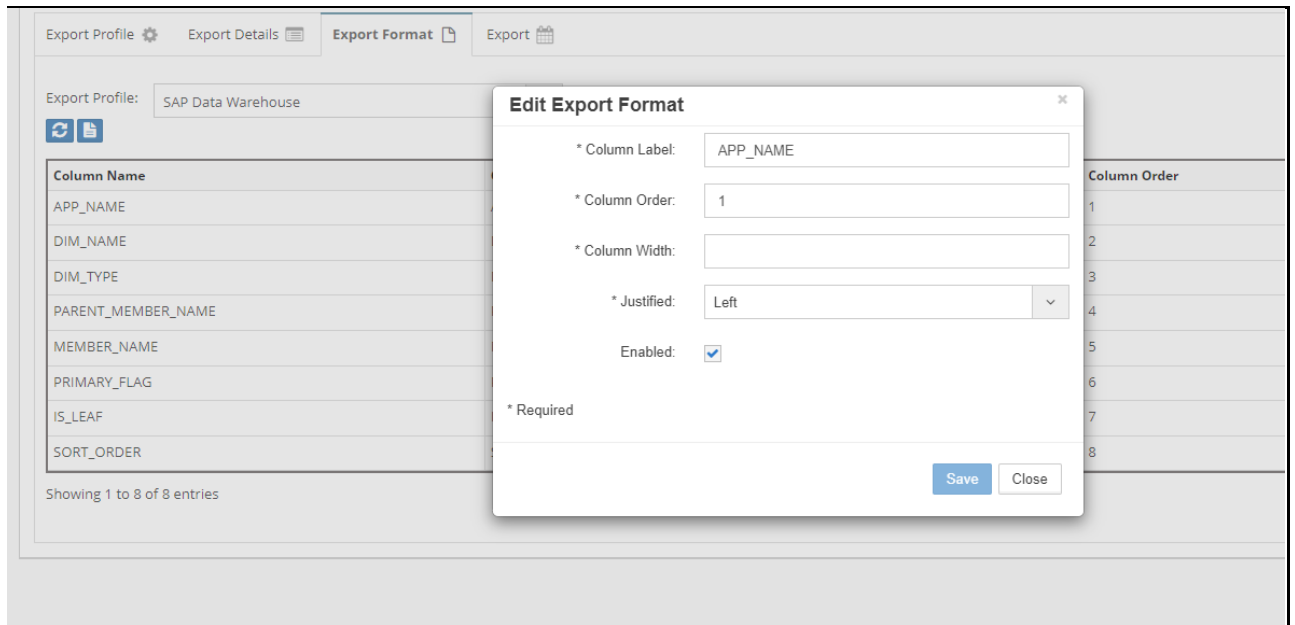

[EW-1738] - New fixed width Export Format allows columns to have fixed column size.

The screenshot shows the 'Export Metadata' application window. The 'Export Profile' tab is selected, and the 'Create Profile' dialog is open. The 'Export Format' dropdown menu is set to 'Fixed Width' and is highlighted with a red box. A red arrow points from the 'Export Profile' tab to the 'Create Profile' dialog. The dialog contains the following fields:

- * Name: SAP Data Warehouse
- Description:
- Enabled: ☒
- Include Pending Requests: ☐
- * Export Format: Fixed Width (highlighted with a red box)
- Column Delimiter: ☐ Comma ☐ Semicolon ☐ Tab ☐ Space ☐ Pipe ☐ Other
- Text Qualifier:
- Generate Separate Files: ☐
- * Export File Name: <EXPORT_PROFILE_NAME_DD_MON_YYYY_HH24_MI_EXPORT_EXECUTI
- Pre-Export Logic Script: Pre-Export Logic Script
- Post-Export Logic Script: Post-Export Logic Script
- Database View: Database View
- Environment: Select

Buttons: Save, Cancel

If Export Format is Fixed Width type then two additional columns are available in the Export Format tab to be set as shown below. Column width and Justified.

Improvements

Provide Visibility in Deployment Monitor Dashboard for Redeployments

[EW-1869] - Provide Visibility in Deployment Monitor Dashboard for Deployments marked for Redeployments. We have reorganized this monitor by adding a new column "Message" after the 'Status' column and removing the "Description" column. Message column will indicate 1 or more requests marked for redeployments.

Deployment								
Manager Monitor Schedule								
25								
Deployment Id	Name	Start Time	End Time	Application	Status	Message	Files	Log
594	NetSuite	12/04/2023 20:00:15	12/04/2023 20:00:25	Netsuite	Failed	Failed		
593	NetSuite	12/04/2023 19:59:55	12/04/2023 20:00:05	Netsuite	Failed	Request ID [127] is marked for redeployment.		
592	NetSuite	12/04/2023 19:58:34	12/04/2023 19:58:44	Netsuite	Failed	Failed		

Add Display Seq# in the Application Configuration Page popup

[EW-1417] - Add **Display Seq#** in the Application Configuration Page popup. This will help users determine the order in which applications are displayed in the Application List of Values on various pages like Explorer and Request.

Application								
Configuration Properties								
   								
Application Name	Enabled	Target Application	Application Type	Version	Display Seq #	Security Class	Deployment	
1. ASO-Sample	☒	ASOsamp	ESSBASE-ASO	11.1.2.4	1	Default	Direct	

Allow Move action for Shared Instances in the Bulk Upload Process

[EW-1895] - Allow Move action for Shared Instances in the Bulk Upload Process. Prior to this release Move action was working only for Primary Instances of members. But with this release users can move shared member using Bulk Upload files.

Improve performance of Large Exports.

[EW-1901] - Improve performance of Ultra Large Exports.

Logic Builder APIs - get_member_prop_value APIs should return values for properties under Statistics Category.

[EW-1909] - Logic Builder APIs - get_member_prop_value APIs should return values for properties under Statistics Category such as Generation, Child count etc.

Logic Builder APIs - Add new Logic Builder API to provide Last Child Member Name under a given Parent Member ID.

[EW-1915] - Add new Logic Builder API to provide Last Child Member Name under a given Parent Member ID. This API will allow us to suggest/auto add new members in a sequence under the given parent member.

Fixes

Insert Shared Members Popup does not show all members in the left side window if the parent member is a root member.

[EW-1882] - Insert Shared Members Popup does not show all members in the left side window if the parent member under which shared instances to be created is a Root member and # of members under the root are more than 25.

Deployment Fails for Oracle Fusion application if the request has Delete Member actions with child and parent members both being deleted

[EW-1886] - Deployment Fails for Oracle Fusion application if request has only Member actions and child member deleted first and then its parent members.

Property delta popup does not show the change in properties when a member is edited and moved in the same request

[EW-1852] - Property delta popup does not show change in properties when member is edited and moved in the same request.

Bulk Upload throws Validation errors for HFM

applications when the file has an HFM "Security Class" Property.

[EW-1890] - Bulk Upload throws Validation errors for HFM application when file has HFM "Security Class" Property.

Compare Member Properties Report shows a variance for Properties which have the same numerical value.

[EW-1893] - Compare Member Properties Report shows Variance for Property values even though they are the same value.

Copy/Paste in the same application/dimension throws errors if the source member is a parent member. Also, Shared instance creation does not follow the same Sort Order.

[EW-1905] - Copy / Paste into the same application/dimension throws errors if the source member is a parent member. Also, Shared instance creation does not follow the same Sort Order. .

Rejecting the Request Line does not refresh the line status immediately.

[EW-1903] - Rejecting Request Line does not refresh the line status immediately in the request page (request lines grid) as well as Request Status in the header section.

Metadata Integrity check Report should exclude Completed and Canceled Request for Member Status Discrepancy check.

[EW-1910] - Metadata Integrity check Report should exclude Completed and Canceled Request for Member Status Discrepancy check .
