Release 25.01.91 Notes

Test Release Date: Jan 13th, 2025, **Production Release Date:** Jan 24, 2025

Agent Update

None

Introduction

EPMware Release 25.01.91

This is a minor release containing new features and enhancements to existing features, and API additions. The features of this release were developed to enhance the design capabilities, performance, and improve ease of use of applications. System administrators and users will benefit from the enhancements across their application.

Change Types	# of items
New Features	0
Improvements	3
Fixes	7

Improvements

EW-2099 - On the Application Properties page - Made the LOV's to select Application name searchable

EW-2101 - Apply Application Sequence # in the property mapping screen

Description

We have a sequence number column in the application table. We added sorting by sequence number.

EW-2167 - Increase the size and width of the Member Search Results Popup on the Request and Metadata explorer pages.

Bug Fixes

EW-2129 - In the Report Module selecting a Report from the Recent Tab did not pass checkbox parameter values

EW-2130 - [SSO] Fixed issue with metadata download for a new installation

EW-2174 - Pagination was not accurate for the Logic Script Screen

EW-2180 - On the Request Page Multi Select Property types showed a large values in large Text rather than a normal Text size.

EW-2184 - [Metadata Explorer & Request Page] Expand All Descendants did not keep selected members highlighted

EW-2190 - Editing a User Name which already exists did not show a user friendly error message

EW-2194 - Reports which have a Checkbox parameter were throwing an error when submitted
