Release 25.07.97 Notes

Test Release Date: July 18th, 2025, **Production Release Date:** July 31st, 2025

Agent Update

None

Introduction

EPMware Release 25.07.97

This is a minor release containing new features and enhancements to existing features, and API additions. The features of this release were developed to enhance the design capabilities, performance, and improve ease of use of applications. System administrators and users will benefit from the enhancements across their application.

Improvements

EW-2269 - Show Pop-up to Prompt User to Save Changes before Switching Property Categories in the Export Module.

Description

In the Administration -> Export -> under the Export Details tab, click on Properties.

A pop-up appears showing a list of properties that can be included or excluded from export, along with a property category dropdown at the top.

Currently, if a user makes changes to the property list but switches to another category without saving, the changes are lost.

Now if the user modifies any properties and tries to switch categories without saving, a pop-up message will display. Message : "Please save your changes before switching property categories"

EW-2275 - Create a new Report to Show Member Matching Details Across Applications

Description

The “Match Members Across Applications” Report will display members that are mapped across applications.

This report will make it easier to determine:

- Members that may or may not exist across all apps
- If they exist then under which parent
- If members exists as a base member or Parent Member etc.

EW-2291 - Improved Performance for large ERP Import processing

EW-2299 - Assign Default Values for the File Names in the Export Profile and Export Book Configurations

New Defaults:

Parameters like NAME, EXECID, and RUNDATE should be shown enclosed in angle brackets

For Export Profiles : Generate Separate Files : Y

<NAME_APP_NAME_DIM_NAME_EXECID_DD_MON_YYYY_HH24_MI>.csv

<NAME>_<APP_NAME>_<DIM_NAME>_<EXECID>_<RUN_DATE_WITH_TIME>.csv

For Export Profiles : Generate Separate Files : N

<NAME_EXECID_DD_MON_YYYY_HH24_MI>.csv

<NAME>_<EXECID>_<RUN_DATE_WITH_TIME>.csv

For Export Book : When Merge Files is Enabled

<NAME_EXECID_DD_MON_YYYY_HH24_MI>.csv

<NAME>_<EXECID>_<RUN_DATE_WITH_TIME>.csv

For Export Book : When Merge Files is NOT Enabled

<NAME_EXECID_DD_MON_YYYY_HH24_MI>.zip

<NAME>_<EXECID>_<RUN_DATE_WITH_TIME>.zip

Default value for Merge Files should correspondingly assign File Name field's default value (For Export Book).

EW-2306 - Support for Long Passwords

EW-2307 - For Generation type Exports in the Export Module Allow Users to use MEMBER_DESCRIPTION to fill Generations

Description

Currently, we have three optional choices or “Fill Generations” column in the Export Module. Default value is null and does not fill generation columns for gaps. We added 4th option in this LOV called “MEMBER_DESCRIPTION”.

EW-2308 - Improved Performance for Member Search in Large dimensions

EW-2312 - Improve Performance of Property Inheritance

Bug Fixes

EW-2311 - Insert Shared Members Pop-up does not show all members under the Root and search was not working for nodes after the second or more pages

EW-2314 - OneStream - Deleting Grand Parent Member Caused Errors in Deployment
