Introduction

EPMware Release 23.06.72

This is a minor release containing new features and enhancements to existing features, and API additions. The features of this release were developed to enhance the design capabilities, performance, and improve ease of use of applications. System administrators and users will benefit from the enhancements across their application.

Change Types	# of items
New Features	2
Improvements	10
Fixes	10
Total	22

New Features

Allow users to Delete Metadata for the entire dimension

[EW-1776] - Allow users to delete metadata for the entire dimension. Currently, a Request needs to be created and the top member deleted to delete all the members of a Dimension. Alternatively, users can now delete all metadata for a given dimension in the Dimension configuration screen.

The screenshot displays the 'Dimension Configuration' interface. At the top, a red box highlights the 'Dimension' header and the 'Configuration' tab. Below this, the 'Application' dropdown is set to '0 ASO-Sample'. A toolbar with '+', 'Save', and 'Refresh' icons is visible. The main table lists dimension members with columns: Name, Class, Description, and Member Description. The 'Attr-TEST' row is highlighted in yellow. A context menu is open over this row, showing 'Edit Properties' and 'Delete Metadata Only' (which is highlighted with a red box). The table data is as follows:

Name	Class	Description	Member Description
Age	Generic	Age	Alias:Default
Alias	Alias	Alias	
Area Code	Attribute	Area Code	Alias:Default
Attr-TEST	Attribute		Alias:Default
Geography		Geography	Alias:Default
Income Level		Income Level	Alias:Default
Measures		Measures	Alias:Default
Payment Type	Generic	Payment Type	Alias:Default

New Property Configuration to show only Parent Members from the Associated Dimensions

[EW-1781] - New Property Configuration to show only Parent Members from the Associated Dimensions. Previously, there were only two options, either to choose all members from the associated dimension for the selected property or only base members from the selected dimension. With this new feature users will have three options. An additional option to select Parent Members only from the associated dimension.

Note : Previously, this field was labeled as “Associated Base Members Only”. Now it is renamed as “Associated Members Level”.

The screenshot displays the 'Property Configuration' window with the 'Edit Property : Job' dialog box open. The 'Associations' tab is selected. The 'Associated Members Level' dropdown is highlighted, showing three options: 'All', 'Base Members Only', and 'Parent Members Only'. The 'Parent Members Only' option is selected.

Name	Dimension	Property Label
MemberName	All	Member Name
Alias	All	Alias
MASK	Measures	MASK
Business Justification2	Measures	Business Justification
Job	All	Job
DefaultParent	All	Default Parent
comment	All	Comment
Consolidation	All	Consolidation
DataStorage	All	Data Storage
MemberSolveOrder	All	Member Solve Order
UDA	All	UDA
MemberFormula	All	Member Formula
TimeBalance	All	Time Balance

Improvements

Security Provisioning – Display Write and Read in Bold

[EW-1057] - Security Provisioning Screen will show Read/Write values in Bold font to differentiate between these values and “None”.

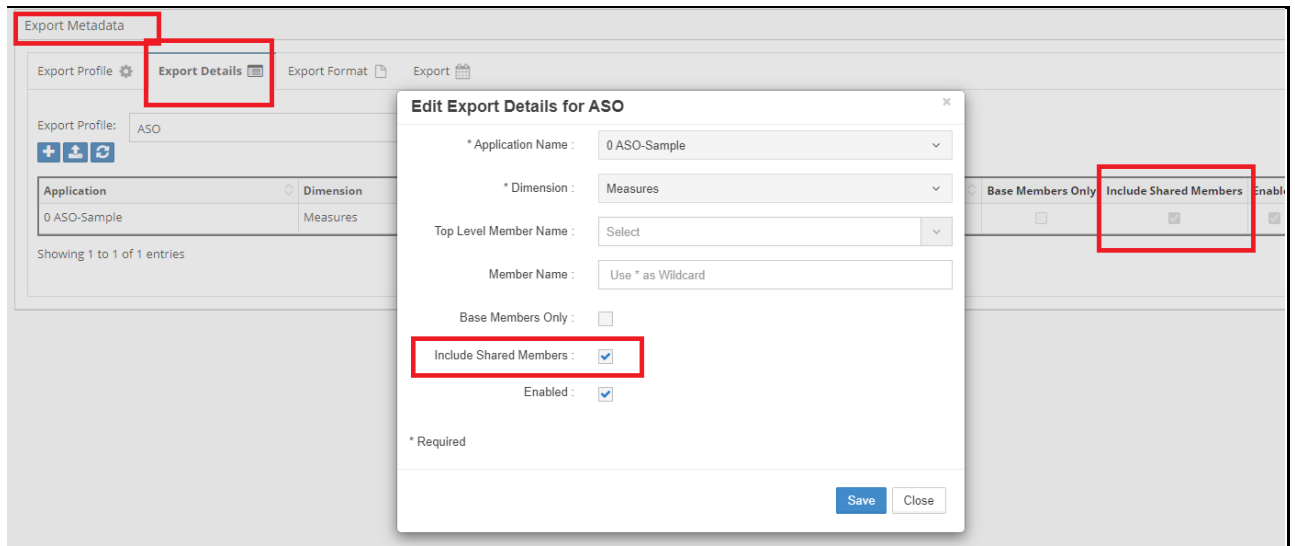

Security Provisioning															
Group Filter:															
pr*  															
 															
Groups	Roles				Modules							Q Search...			
	Requestor	Reviewer	Approver	Default	Metadata	Logic	Audit	Security	Config	Workflow	Deployment	10x - Customers	10X - Oracle	10X_APPROVER	
Product_User_Create	☐	☐	☐	☐	☐	☐	☐	☐	☐	None	None	None	None	None	
Products_Users	☒	☐	☐	☒	☒	☐	☐	☐	☐	Read	Read	None	None	Write	

Improve Performance of Deleting and Canceling Large Requests

[EW-1654] - Improve performance of deleting and canceling large Requests. For example, If a request has 3000 lines with Edit Properties action then deleting the request will now take significantly less time.

Add a New Filter in the Export Details page to Include or Exclude Shared Members"

[EW-1717] - Add a new filter in the Export Details page to "Include Shared Members" or "Exclude Shared Members".

Show Filters in the ERP Import Builder Configuration screen

[EW-1753] - Show two Filters, Application and Dimension, in the ERP Import Builder Configuration screen to help easily identify specific ERP Import Configurations.

ERP Configuration

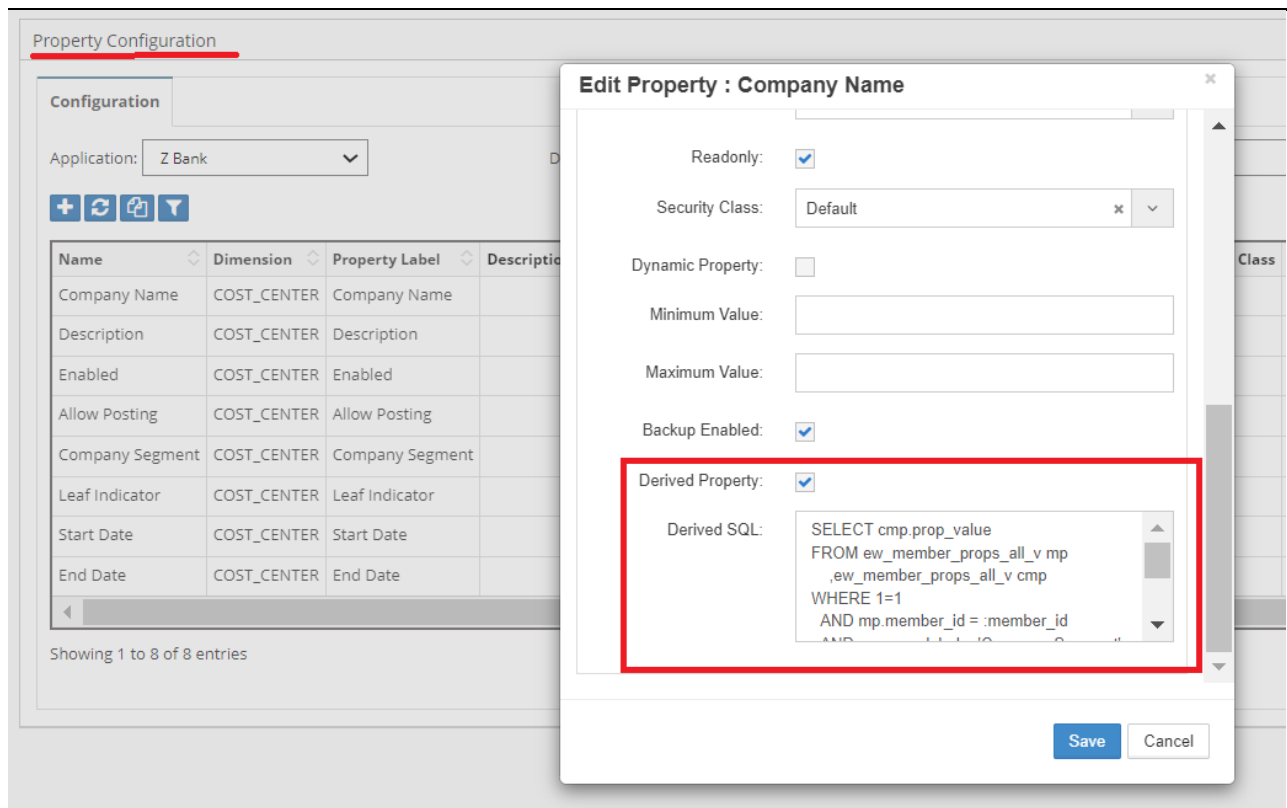

Application: ▼

Dimension: ▼

Interface Name	Application Name	Dimension Name	Priority	Workflow	Enabled	Ignore Unchanged Record

Make the Derived SQL Field a required property if the Derived Flag is set to "Yes"

[EW-1769] - Derived SQL field should be a required property if Derived Flag is set to "Yes" in the Property Configuration Screen. This will help users to not miss setting up the SQL if the property is a derived property.

Support Email Notifications with SSL and TLS 1.2 protocol

[EW-1770] - Support Email Notifications with SSL and TLS 1.2 protocol.

We have introduced two new properties in the Apache properties file to enable/disable SSL for the email SMTP server. This is applicable for all On Premise customers as well as for cloud customers who are using their own SMTP server for email notifications.

```
mail.smtp.ssl.enable=false
mail.smtp.ssl.protocols=TLSv1.2
```

Note: All On Premise Customers must add these two properties to their `fs_system.properties` file (OR `fs_custom.properties` file). If you have taken backup of files and use them during patch installation, please ensure they are part of the backup files too.

Export Details page for Generic applications - Change the label from "Inactivated" to "Inactive"

[EW-1770] - Export Details page for Generic applications - Change the label from "Inactivated" to "Inactive".

The screenshot shows the 'Export Details' page for the 'Customers' application. The 'Export Metadata' tab is selected. The 'Export Profile' is 'Customers'. The 'Application' and 'Dimension' are both 'Customers'. The 'Edit Export Details for Customers' dialog box is open, showing the following options:

- * Application Name : Customers
- * Dimension : Customers
- Top Level Member Name : Select
- Member Name : Use * as Wildcard
- Base Members Only : ☐
- Include Shared Members : ☒
- Enabled : ☒
- Include Inactive Members : ☐**

* Required

FYI
This option is applicable to GENERIC Applications only.

Add API in the Logic Builder module to retrieve Members for a given dimension

[EW-1770] - Add API in the Logic Builder module to retrieve Members for a given dimension.

Please refer to the [Logic Builder API](#) for more information.

Properties having Large Text Values will wrap values in Metadata Explorer and Request Pages

[EW-1783] - Properties having Large Text values should show wrap values in Explorer section in both Metadata Explorer and Request Pages

Improve performance of Large Bulk Upload file

[EW-1787] - Large Bulk uploads, (for example, 5000 lines), takes an hour or more for complex applications. Validation are improved significantly with this release and this specific step in the processing of the file will be much faster.

Fixes

OneStream - Changing Default Description of an existing member changes Security Properties

[EW-1774] - OneStream - Changing the Default Description of an existing member changes Security Properties. Whenever the default Description was modified and deployed to the OneStream Application, Security Settings of that member was reverted back to the default values. This issue is now fixed.

Note: Please download the latest EPMware DLL from AWS and replace it on your OneStream server.

In certain cases, Pending Approvals are mismatched between what is shown in the grid versus what's shown in the Workflow on the Dashboard.

[EW-1777] - Pending Approvals mismatch between what is shown in the grid versus shown in the Workflow graphic for certain cases on the Dashboard page.

Dashboard shows users in the Pending Approvals list even if the user has already approved request lines in certain cases.

[EW-1778] - Dashboard shows user in the Pending Approvals list even if the user has approved request lines in certain cases.

Member Description is not shown in the Hierarchies related Reports

[EW-1779] - Member Description is not shown in the Hierarchies related Reports

Shared Members not Included in the "Compare Parent Members" Report

[EW-1784] - Fix the issue (not including Shared Members) in the Report "Compare Parent Members"

Fixed display issues in the Compare Member Properties Report for OneStream applications for properties Vary By Dim Properties and Primary/Shared instances

[EW-1785] - Fix issues in the Compare Member Properties Report for OneStream applications such as Vary By Dim Props, Primary/Shared instances

Application Import is failing if the File Name is more than 50 characters

[EW-1788] – Fixed issue with Application Import failing if the File Name was more than 50 characters. System will now support file names up to 100 characters.

Generation type Exports with Base Members Only setting shows one extra column

[EW-1789] - Generation type Exports with Base Members Only setting shows one extra column

Moving a Member and then moving it back to its original parent member showed a request line where moved from and moved to are same

[EW-1793] - Moving a Member and then moving back to its original parent member shows a request line where moved from and moved to are the same. For such cases, the system will delete the original move member action line and add a note in the Request Activity Log.

Remove Trailing and Leading White Space from Property Values

[EW-1798] - Removed Trailing and Leading Spaces from Property Values.
