Release 25.06.96 Notes

Test Release Date: June 25th, 2025, **Production Release Date:** July 7th, 2025

Agent Update

None

Introduction

EPMware Release 25.06.96

This is a minor release containing new features and enhancements to existing features, and API additions. The features of this release were developed to enhance the design capabilities, performance, and improve ease of use of applications. System administrators and users will benefit from the enhancements across their application.

Improvements

EW-2270 Request Page: show background color for required property

Description

Required field of property configuration, show background color on request page for property to identify its required.

EW-2276 Create a new attribute in Application Configuration to indicate whether Application is used for Environment Mapping purposes only.

Description

We need to determine the role of an application to determine whether it will be managed with Metadata or it will be used purely for Environment mapping i.e. DEV or QA.

This will allow the application to not be shown in Application LOVs, Metadata Explorer etc.

EW-2282 Add a Request “Description” parameter for all Request related Audit Reports

EW-2289 Add a validation to not allow duplicate action lines in the Bulk Upload file for actions taken on same member such as Create or Move.

Description

If a user creates multiple lines for the same member and same action such as Create, Delete, Rename or Move in an Application, it should throw an error.

EW-2292 In Export Module add new field to apply Text Qualifier (like Double Quote character) for empty values.

Description

Create a new checkbox in the Export Configuration page.

Label : Apply for Empty Values

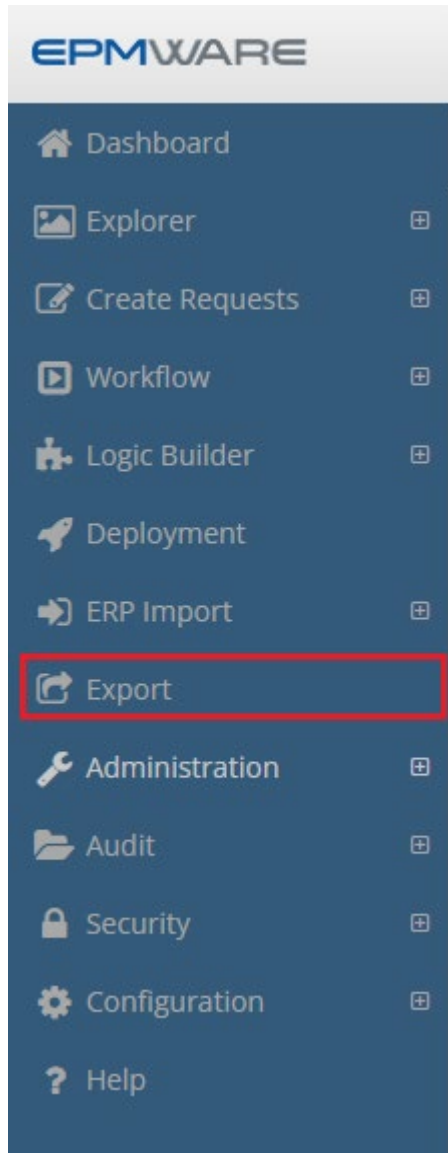

Display type : Checkbox

Default Value : N (Unchecked)

EW-2293 Create new module for Export on Security Provisioning page

Description

Create new module under Security Provisioning the Export Module. This will allow for explicit security provision and segregation of duties for the Export Module. The Export module navigation has been removed from “Administration” to its own Menu Navigation, “Export”

EW-2296 Show only those Export Profiles and Export Books for which logged in user have access

Description

Ensure current user who has logged in can only see Export Profiles and Books that the user has access to.

EW-2297 Created a link under the Help menu for REST API Documentation

Description

The REST API documentation is now a separate document and its link is added under the Help menu.

Bug Fixes

EW-2283 Navigation Issue for Root Members When Reordering Children of the Root node

Description

When reordering all immediate children under the Root member, clicking on the member hyperlink does not navigate the user to that member or hierarchy on the Request page. This was failing only for the **Root** member when action is “Reorder children”.

EW-2294 In Reports module dependent LOV parameters are not cleared when source LOV parameters are changed

Description

For example, the compare hierarchies report. If we ran it for the time with top Level Member name and then change dimensions, it will remove top Level member names from the report parameter, but internally it is still passing the parameter.

EW-2301 Metadata Explorer does not show properties which are a Hyperlink for Text Display Type

Description

Metadata Explorer does not show not show properties which are a Hyperlink for Text Display Type.
