Release 25.03.93 Notes

Test Release Date: March 21th, 2025, **Production Release Date:** March 31, 2025

Agent Update

None

Introduction

EPMware Release 25.03.93

This is a minor release containing new features and enhancements to existing features, and API additions. The features of this release were developed to enhance the design capabilities, performance, and improve ease of use of applications. System administrators and users will benefit from the enhancements across their application.

New Feature

EW-1681 - Add Dimension Filtering at the workflow level

Description

Add filtering to limit the Applications and Dimensions that are allowed for individual Workflows.

Workflow Properties : 1. Node Security Testing

General

Dimension Filtering

Dimension Filtering: ☒

Improvements

EW-2142 - Allow users to delete relationship in an extended Consolidated dimension in OneStream Applications

Description

If a member has a relationship in an extended dimension (Consolidated type) then Delete Member does not work.. The reason for this issue is GUI is not capturing the Parent Member information.

For example, "Location" dimension has a member 5664.

"Consolidated" is another dimension which has members from Location dimension. 5664 for example is under a Parent member LOC019.

EW-2203 - Add Properties Derived Property Type to the Hierarchies with Properties Report

EW-2215 - Apply Workflow based Security to the requests shown in the Dashboard

Description

Only display requests in the dashboard that the user has Security rights to view

EW-2217 - For new properties enable "Deploy Default Value" checkbox under the Deploy Tab

Description

For new properties enable "Deploy Default Value" checkbox under the Deploy Tab.

The screenshot shows a dialog box titled "Edit Property : AllowInput" with a close button (X) in the top right corner. The dialog has five tabs: "General", "Defaults", "Display", "Deploy", and "Associations". The "Deploy" tab is currently selected. Inside the "Deploy" tab, there are several fields and checkboxes:

- "Deploy Property Name:" followed by a text input field.
- "Deploy:" followed by a checked checkbox.
- "Substitute NULL value during deployment:" followed by a text input field.
- "Deploy Default Value:" followed by a checked checkbox. This entire row is highlighted with a red rectangular border.
- "Conditional Deploy SQL:" followed by a large text area.

At the bottom right of the dialog, there are two buttons: "Save" (in blue) and "Cancel" (in white).

EW-2221 - In Property Mapping screen exclude Derived Properties from Properties List

Manage Property Mappings by Application

Dimension Label: 0 - HFM Account Property Label Filter: *

+ [Icon] [Icon]

Showing 1 to 2 of 2 entries

Account Type

Alias:English

Calc Attribute

DDataType Top Member

DFuncStrm Top Member

DLocation Top Member

DProduct Top Member

EW-2224 - Log User who submits an Application Import task in the Application Import Log

EW-2228 - ERP Import - Remove trailing or leading unbreakable space (ASCII value 49824) while parsing Import file

Description

For ERP Imports, remove the trailing or leading unbreakable space (ASCII value 49824) while parsing Import file.

These are special space characters and typically used in international char sets.

Bug Fixes

EW-2226 - Paste As Sibling hierarchy action of a member under the same parent member should be not allowed

EW-2227 - [Property Mappings] Property Id is not set correctly

Description

On the Property mapping page, when mappings are updated it is updating the label correctly but PROP Id is not set correctly when you update it multiple times.

EW-2237 - Previous Sibling member derivation for Essbase and OneStream apps for new members in the same request occurs in a reverse order

EW-2240 - For List of Value properties if the value has an ampersand character in it then the property value is not shown in the Metadata Explorer or Request Property panels.
