Release 23.05.71 Notes

Test Release Date: May 19, 2023, **Production Release Date:** June 2, 2023

Agent Updates

None

Introduction

EPMware Release 23.05.71

This is a minor release containing new features and enhancements to existing features, and API additions. The features of this release were developed to enhance the design capabilities, performance, and improve ease of use of applications. System administrators and users will benefit from the enhancements across their application.

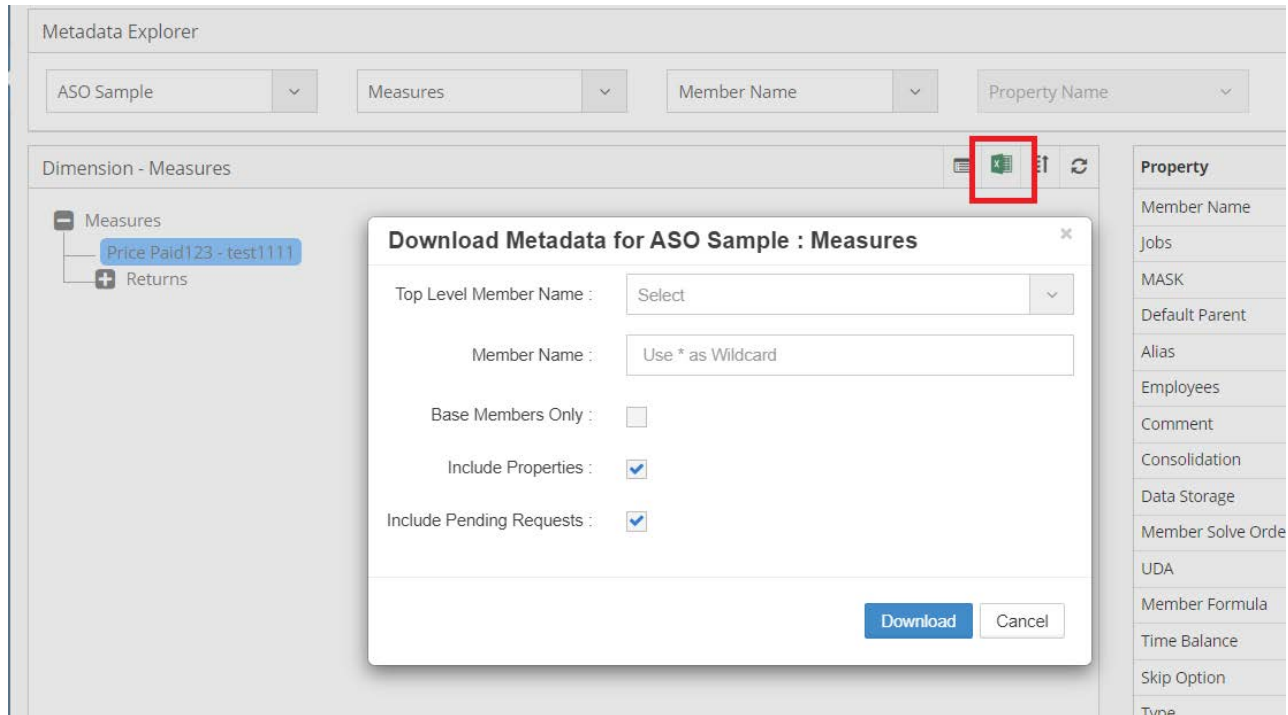

Change Types	# of items
New Features	1
Improvements	8
Fixes	3
Total	12

New Features

Allow user to Export Metadata from Metadata Explorer and Request Page

[EW-958] - Allow users to Export Metadata from Metadata Explorer and Request Page

We have introduced a new “Excel” icon in Metadata Explorer as well as in the Request Page to allow users to download metadata for the selected dimension.

Note: For the first time when you download metadata you may see a pop up blocker in the browser and you may need to enable it to download the file.

Improvements

Create a Dimension level property for Generic applications to allow shared instances and Activate/Inactivate members.

[EW-1688] - Create Dimension level property to indicate whether dimension can have shared instances and Activate/Inactivate members. This option is available for GENERIC applications only.

Dashboard x Metadata: ASO Sample x

Derived: ☐

Deploy: ☒

Allow Shared Members: ☒

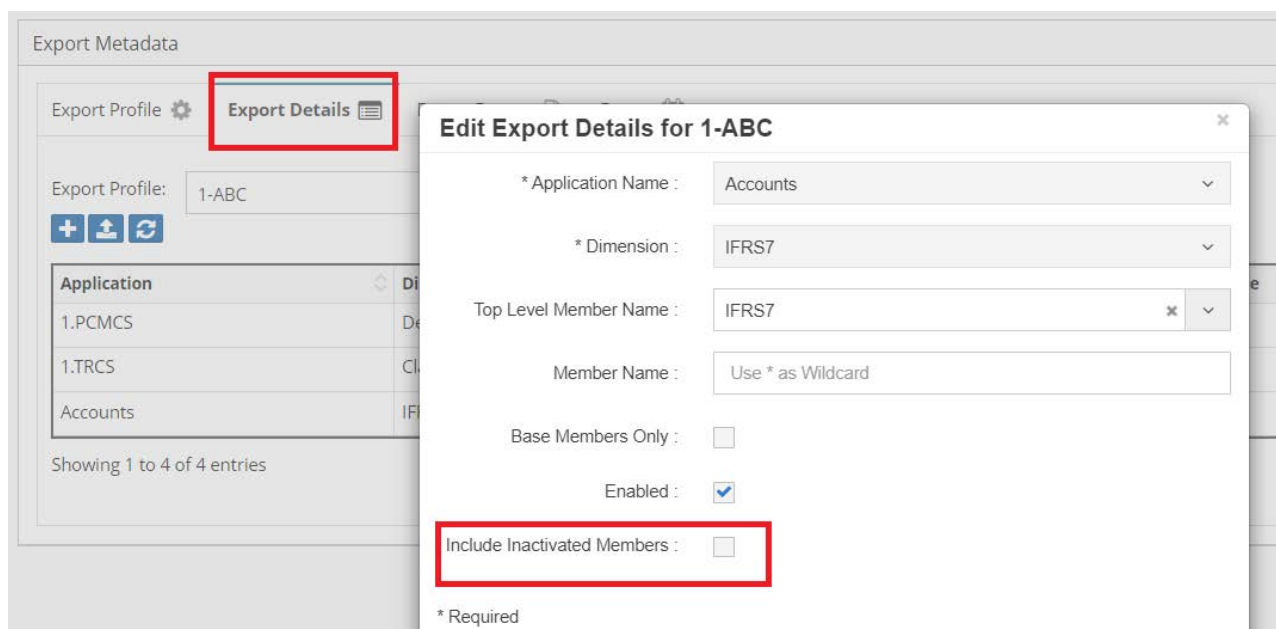

Allow Activate/Inactivate Members: ☒

Application Import for Large Apps (GENERIC type) Performance Improvement

[EW-1706] - Application Import was taking a very long time for large generic applications. This fix significantly improved the time to import.

Add a new filter in the Export Details page to "Include or Exclude Inactivated Members"

[EW-1727] - Add a new filter in the Export Details page to "Include Inactivated Members" or Exclude them. This field is eligible only for GENERIC applications.

Include a "Members Status (Active/Inactive)" column in the Reports for Generic Applications

[EW-1743] - Show "Members Status (Active/Inactive)" column in following 2 Reports for Generic Applications. Only Generic applications have functionality of Active/Inactive members

- Hierarchies
- Hierarchies with Properties

Change the label of the "Active Members Only" field in the Export Configuration screen to "Include Pending Requests"

[EW-1755] - Change label of the field "Active Members Only" in the Export Configuration screen to "Include Pending Requests"

Edit Profile

* Name: 1-ABC

Description: 1-ABC

Enabled: ☒

Include Pending Requests: ☐

Export Format: CSV x v

Column Delimiter: ☐ Comma ☐ Semicolon ☐ Tab ☐ Space ☐ Pipe ☐ Other

Assign Max Length property and Start Date for Oracle Fusion Cloud application during App Import

[EW-1759] - Assign Values to the "Max Length" and "Start Date" properties for Oracle Fusion Cloud application during Application Import by scanning segment values files.

Improve the performance of Large Planning Application Deployments

[EW-1767] - Improve performance of Large Planning Application Deployments.

Include "Allow Shared Members" and "Allow Activate/Inactivate Members" in the Metadata →Dimensions Report

[EW-1772] - "Allow Shared Members" and "Allow Activate/Inactivate Members" are included in the Metadata-->Dimensions Report. This Report shows all configuration details for Dimensions.

Fixes

Planning Application Import - Exclude UDA property assignments for Attribute Dimensions

[EW-1760] - Planning Application Import - Exclude UDA property assignments to Attribute Dimensions. It was giving an error during the Application Import process.

Request throws Validation Errors for required properties if a member has an Edit Action and a Move action in the same request.

[EW-1762] - Request throws Validation Errors for required properties if a member has an Edit Action and a Move action in the same request.

Bulk Upload throws Validation errors for Properties which are lookup types and the values are not in the exact case for Lookup Codes

[EW-1768] - Bulk Upload throws Validation errors for Properties which are lookup types and values are not in the Exact case for Lookup Codes.
