Release 25.05.95 Notes

Test Release Date: May 20th, 2025, **Production Release Date:** May 30th, 2025

Agent Update

None

Introduction

EPMware Release 25.05.95

This is a minor release containing new features and enhancements to existing features, and API additions. The features of this release were developed to enhance the design capabilities, performance, and improve ease of use of applications. System administrators and users will benefit from the enhancements across their application.

New Features

EW-2264 - Support OneStream Application version 8.5.1

EW-2243 - Added Support for Parquet File type in the Export Module

Description

The service is **enabled/disabled** using a configuration property `parquet.enabled`

Bug Fixes

EW-2258 - OneStream – When deleting a Parent Member which has a child member which is Shared, then the primary instance of the Shared child member should not be deleted when deployed

Description

If a Parent Member has child members which are Shared then deleting the parent members in a

request should NOT delete Primary instances of those child members. It should just remove the relationship of those members with the parent members. Currently, Primary instances of the child members under that Parent member get deleted.

Note: In OneStream there is no concept of Primary and shared

EW-2266 - Deployment is not marked Completed in certain cases when deployment has many applications

Description

If using an older version of the Agent which gives Response 302 error then deployments which have a large number of applications are not marked as completed. This is a very rare occurrence but now it is fixed.

EW-2273 - Server Screen - When new server is added, pagination is not updated and refreshed

Description

Configuration → Infrastructure → Server

When a new server is added, the grid is not refreshed and also the pagination details are not correct.

EW-2274 - Export Module - Issue when there is an “&” in the export profile name

Description

When there was an “&” in a user name, and error occurred during an Export.

EW-2278 - Issue with Polish language character in username in the Migration module filters

EW-2279 - [Dashboard] Mass Approve of Requests when using filter of “Requested By” was not restricting the list of requests

Improvements

EW-2061 - Perform Property Configuration Validations before Saving

EW-2218 - Enable “Metadata Module” flag when creating a new User Group in the Security Module

EW-2233 - After adding a new user (SAML or Native) the grid is automatically refreshed

EW-2235 - Allow renaming of member names in HFM applications

EW-2241 - Show Action Code in the Bulk Upload Validation Popup

EW-2250 - Added "Property Association" type issues in the “Metadata Integrity Discrepancies Report”

EW-2256 - Add new parameter for specifying the Parent Member name in the “ancestors_having_prop_value” Logic Builder API

EW-2277 - Allow Native Users to change their own login password

Description

Allow Native Users to change their Password. On the top right corner under User Name select “Change Password” .
